

LED BackLight Sheet Panel

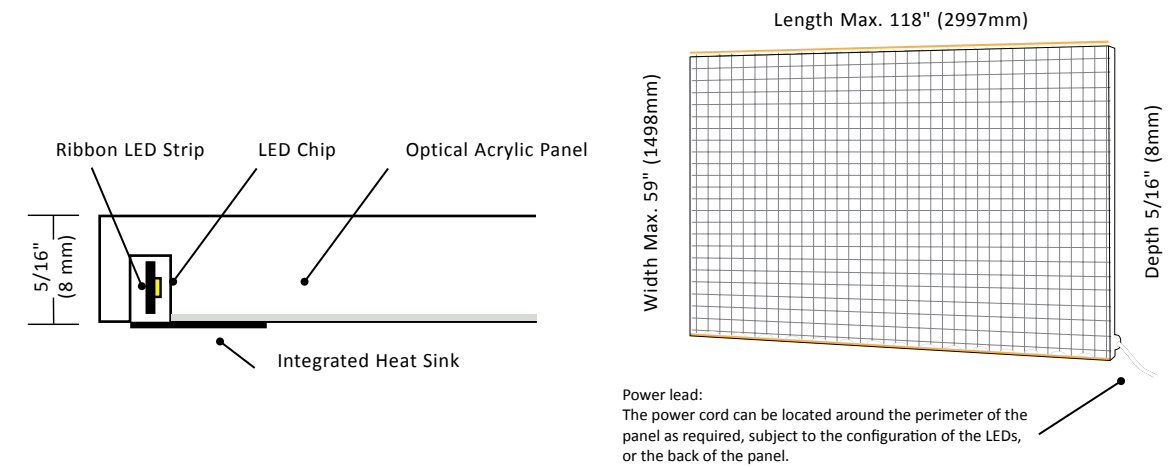

LED BackLight Sheet Panel is designed to emit a bright, even output of light across the entire surface of the panel. Unlike traditional light panels, which have the light source mounted on the exterior of the LGP(Light Guide Plate). LED BackLight Panel integrates high brightness LEDs and heat sink into our exclusive updated 3D V-cutting LGP which makes it possible to produce "frameless", rectangular or special custom shaped LED Light panels for various application needs.

Feature

- Available in custom sizes & shapes
- Can be used in "Frameless" Designs
- 3D V-cutting or Laserdotting technology
- High brightness(2,000-10,000 lux)
- Patented heat sink technology
To maximize LED lifespan(50,000hours)
- Low power consumption
(70% less than traditional fluorescent)
- Energy saving and maintenance free
- Superior consistent light quality
- 2-year warranty
